None of us actually wants to consider these issues!

We believe: "what could possibly happen to me?!" – recognize that every day is precious. Taxation, fees & debts could eliminate any inheritance you thought you were leaving to your family.

Don't wait for retirement to plan – you risk your family having to go without the wealth you have amassed!

If you have retired and have not planned, your family could suffer.

Invest in your family, spend an evening with us addressing these issues.

By working together we will ease the perceived burden of identifying the questions, addressing the issues and implementing the solutions.

Together, we will answer the questions.

Debbie Rosen Solow Attorney at Law practices law in Beit Shemesh and Raanana with specialties in residential property, wills and inheritance.

Felicia M Seaton practices U.S. Estate Planning Law for Americans living in Israel and others interested in investing in the US.
